

## **Michael J. Shamblott, PhD**

### **Chief Scientific Officer**

Michael joined Morphogenesis, Inc. in 2016 as Principal Scientist of Research and Development. Michael is a stem cell biologist with extensive experience in pancreas development. Michael received his Ph.D. from the University of Maryland in cell and molecular biology and was both a Post-Doctoral Fellow and Assistant Professor at Johns Hopkins University School of Medicine. In these positions, Michael pioneered the derivation and differentiation of human embryonic stem cells and focused on the development of therapies to treat diabetes. Prior to joining Morphogenesis, Michael was the Walmart / Sam's Club Associate Professor of Pediatrics at the University of South Florida Morsani School of Medicine, where he developed pharmacological therapies to stimulate endocrine pancreatic regeneration.
